

FOOD SAFETY MOBILE DESIGN

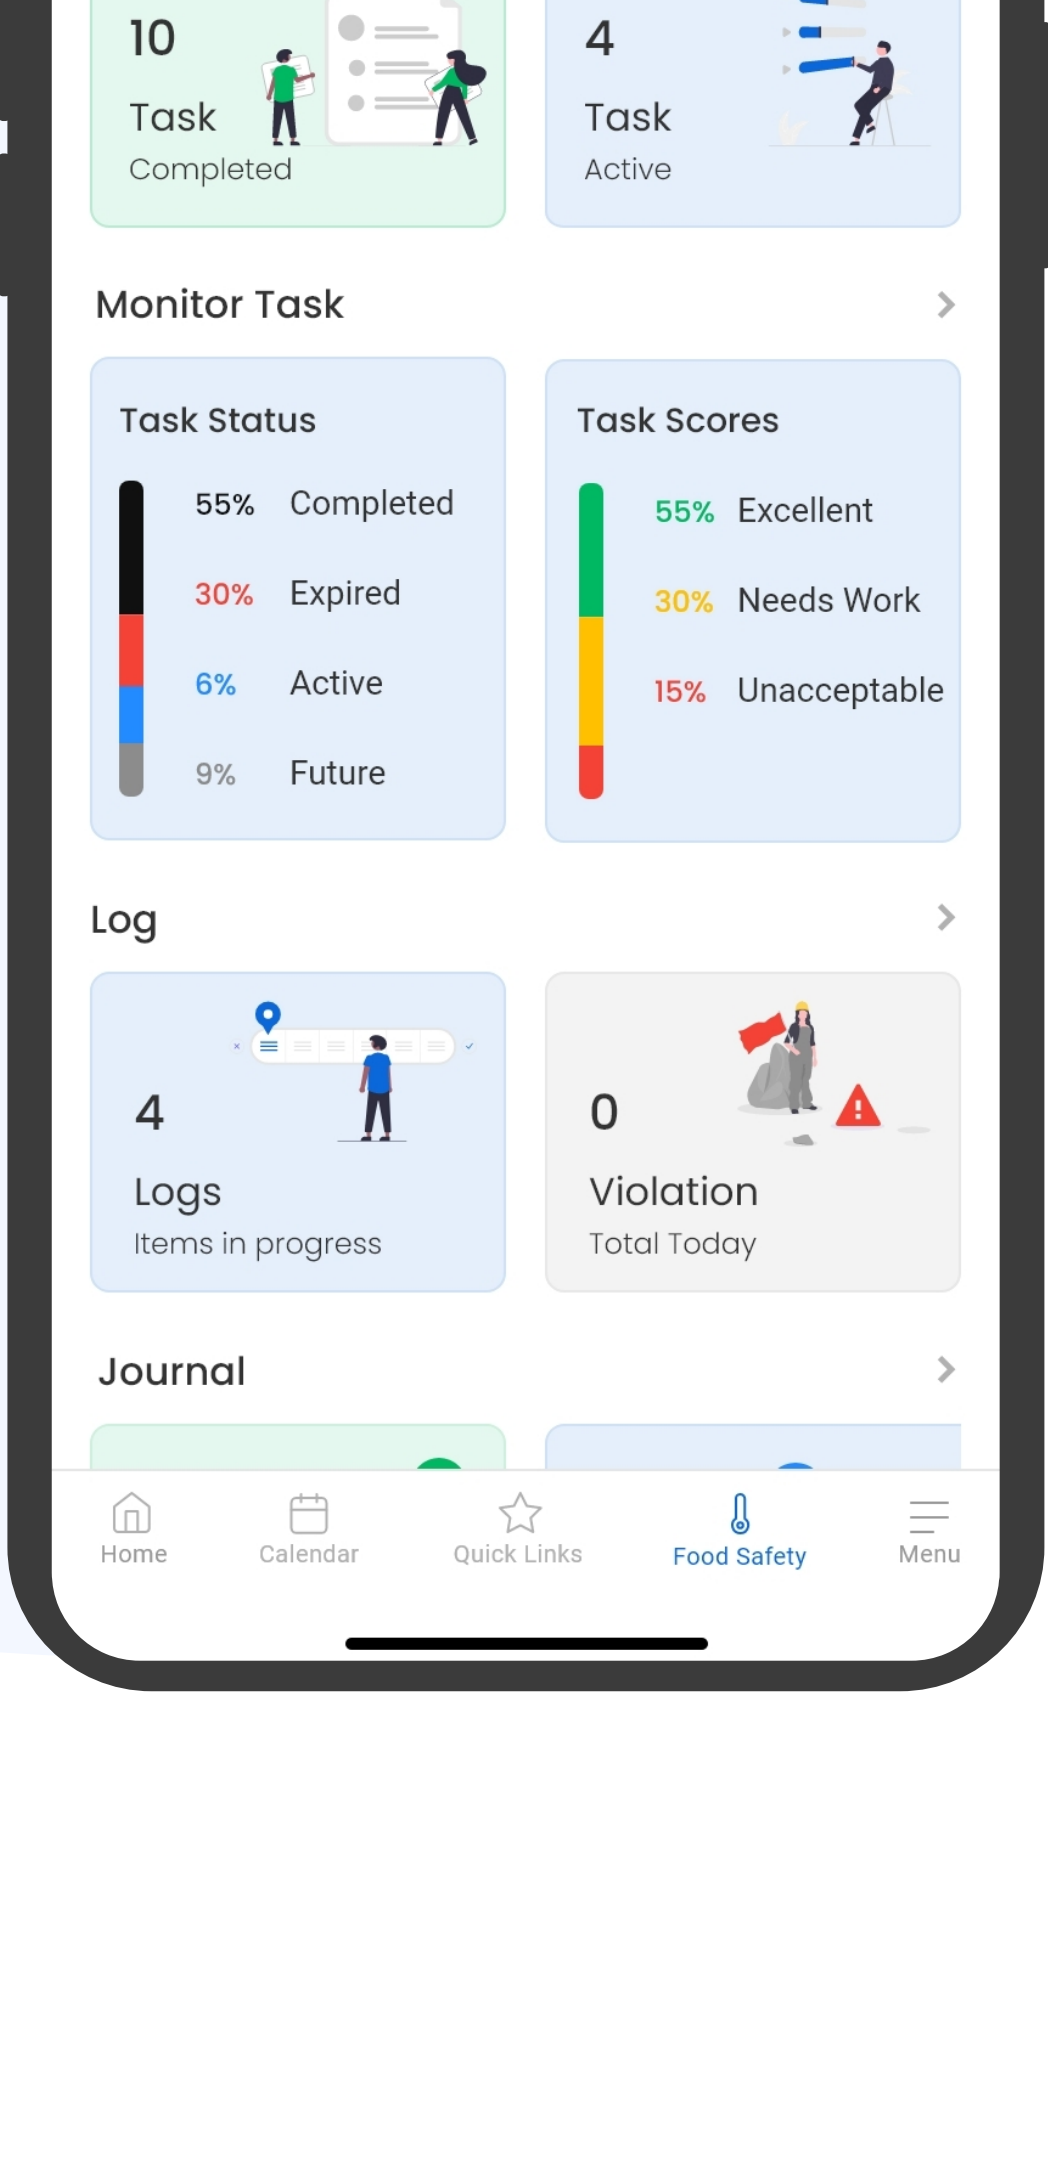

Handheld devices are go-to these days to complete minimal interaction task and it is easy to use. This mobile application does the same with food safety application in retail operation management.

About this project

In this project, client wanted to simplify the process of web app and make it handy for retail employees to use. It was necessary to develop a single multi-functional mobile app for this purpose which could help store employee's complete their task in stipulated time

Mobile app helps employees to serve customers easier and faster while making their work process simpler and easier.
